I, BALL

THE GAME

The totally evil Terry Ball has captured your Spherical Balls. Lower Ball, Edgy Ball, Glow Ball, and No Ball. Armed with only a bubble gun, you must enter Terry Ball's domain and struggle through the sixteen defence zones to retrieve the balls. Each zone will offer a constant barrage of obstacles - glowing ones are electrified and will electrocute your ball on contact. Terry Ball has also populated these zones with such nasties as doughnuts, microwave ovens and roulette wheels which are harmless when they first appear but become highly dangerous when they stop flashing. However, do not despair, for as you negotiate these deadly zones, POWER DISCS will be awarded to you. These discs will allow you to temporarily destroy any one of some kind. Weapons is shown as a series of icons to the right of the screen. These are TURBO BOOST, HORIZONTAL LASER, SMART MISSILE, BULLET SPRAY, Front and Rear Bubble Gun, ELECTRO SHIELD, LASER SPRAY, Left and Right Lasers, MOLECULE BOMB, RAINBOW RIFLE LASER. POWER DISC will instantly appear on the screen. Press the TURBO BOOST Now progress onwards through the first zone. If you let your bubble gun fire too long then it will overheat and you will have to wait for it to cool down. Every time you die, you will lose a piece of weaponry. As you progress through the levels, some FAULTY DISCS will start to appear. These discs make movement even harder. Finally, on the twenty-seventh POWER DISC, you will get the ultimate weapon - PICK IT UP FOR RAINBOW RIFLE LASER.

THRUST

THE GAME

The Empire is about to launch a major offensive against the Intergalactic Empire. In preparation for this, they have captured several battle-crafts, but they lack the essential power sources for these formidable craft, Kivstrom Pods.

You have been commissioned by the resistance to steal these pods from the Empire's storage plants. Each planet is defended by a battery of Limpet guns (temporarily disabled, the more shots fired, the more critical the reactor, the more guns will take to recharge. BUT BEWARE! If you fire too many shots at the reactor, it will become critical, giving you just ten seconds to clear the planet before it is destroyed. If you have not already retrieved the pod stored at that planet, then you will have failed the mission. If you have retrieved the pod, and you will receive a hefty bonus. Further into the Empire's system, you will encounter planets with REVERSE GRAVITY and something even more deadly.
